TECHNICAL PROJECTS

MindAgent : AI-Powered Multi-Agent Productivity Platform

[Live Demo](#)

- Architected an AI-powered multi-agent productivity platform using Next.js 15 (React 19) and Express.js, supporting specialized AI workflows for content generation, image analysis, and data processing.
- Integrated OpenRouter API with Server-Sent Events (SSE) for real-time streaming responses and implemented custom Multer and Zod pipelines for secure CSV/XLSX file parsing and validation.
- Secured application routes and data workflows using JWT authentication with HttpOnly/Bearer handling, bcryptjs encryption, and express-rate-limiting to ensure robust multi-user isolation.

Fable : E-book Sharing Platform

[Live Demo](#)

- Architected a full-stack e-book sharing and monetization platform using Next.js 16(React 19) and Express.js, featuring role-based dashboards for readers, writers, and administrators.
- Integrated Stripe SDK for secure payment processing and checkout workflows alongside Better Auth with MongoDB adapter for robust role-based route guards and session handling.
- Implemented dynamic e-book cataloging, purchase tracking, and bookmarking systems optimized with server-side pagination and Framer Motion animations.
